Why?

ASA

AIRPORT SERVICES ASSOCIATION

- ASA is the voice of the Ground Service Providers (GSP) industry employing 1.6 million people worldwide
- Today, we tend to be the largest employers at most airports, ensuring that air travel is running smoothly.
- ASA aims to strengthen the reputation of the industry and influence decision-makers on issues that are relevant to our sector.

- **Safety is paramount** to the aviation industry, yet there is no credible benchmark for aircraft ground damage or unified Safety voice for Ground Service Providers (GSPs).
- The ASA safety committee aims to raise the level of safety amongst GSPs via a combination of benchmarking and using **data-driven information to recommend industry standards.**

How?

ASA

AIRPORT SERVICES ASSOCIATION

SID is currently being developed for Aircraft Ground Damage,
Near miss and Hazard benchmarking.

SID Safety
Incident
Database

Objectives:

- **Benchmarking** for Aircraft Ground Damage – online dashboards
- **Identify Trends to drive improvement** through industry forums

The aspiration over time: to grow and evolve to include personal injuries, Security, GSE and environmental incidents.

- ✓ **Benchmark** aircraft Ground Damage, near miss and hazards
- ✓ **Comparable Rates** by IATA region & Global
- ✓ Use within **your RFP** and discussions **with customers**
- ✓ Easy to use with **Standard Taxonomy**
- ✓ **Automated** solution
- ✓ **Meaningful** trends for GSPs
- ✓ **De-identified** prior to submission
- ✓ **Free** to ASA member who submit their quarterly data
- ✓ Ability to create their **own dashboards**
